***CONTRACTOR CALLS GREENPLUMBERS® ‘A GREAT STEP FORWARD’***

SACRAMENTO, CA: An editorial in the February 2008 edition of Contractor magazine touts GreenPlumbers’ new U.S. training and accreditation program as a “great step forward.” Contractor’s editor-in-chief, Bob Mader, writes that he is “delighted” that GreenPlumbers® has taken off, saying, “Who better to promote the cause of water conservation than (plumbers) who are in customers’ homes and businesses all the time?”

The GreenPlumbers® training and accreditation program offers five courses that total 32 hours of training, with more classes in the works. The current classes cover climate and water care, solar hot water, water efficient technology and more. The program is available to all licensed plumbers and contractors.

In the Contractor magazine editorial, Mader opines that it’s “insane” that the U.S. flushes 6.8 billion gallons of drinking water down the toilet every day. “The GreenPlumbersUSA certification will give (plumbers) the knowledge and confidence to talk about products and services that save water.”
